

We purchased the MAASAI from Summit Worx in 2015. The staff are very knowledgeable and easy to work with. They invited us out to their shop several times and even came out to our Emergency Operations Center a couple of times to provide support and demonstrations. As a result of purchasing the MAASAI, we now have a complete back up communications system. The MAASAI provides us with Voice over Internet Protocol (VOIP), Data, and internet. We won't skip a beat during a disaster when it comes to communicating with county and state partners. I would recommend Summit Works to anyone looking to find a complete solution for back up communications.
